MEMBERS OF THE HAMAT GROUP

HAMAT

© FLOORING PARTNER

HAMAT specialises in floors and entrance zones, operating in more than 50 countries worldwide. Our expertise and experience enable us to respond flexibly to your request. Thanks to the vertical integration of our entire production process, we supply you with exclusive products of premium quality. Distinctive, complete and reflecting the latest trends. All production facets and know-how in-house. Everything is available from stock, resulting in quick delivery times and the best possible prices! We have the capacity to respond directly to the latest developments and trends.

Sustainability

Naturally, our aim is to limit the impact of HAMAT on the environment as much as possible. For this reason, we invest a great deal of time and money in developing sustainable products, production methods and procedures to limit waste and reduce energy consumption. Our 100% natural coconut mat is an excellent example.

Innovation

Our fully automated warehouse boasts space for up to 16,700 pallets! This means we work as efficiently as possible and our stock is ready and waiting for delivery to you at a moment's notice.

NL

Als specialist in vloer en entreezones is HAMAT actief in meer dan 50 landen over de hele wereld. Met die kennis en ervaring kunnen we optimaal anticiperen op uw behoefte en leveren we precies wat u nodig heeft. Doormiddel van verticale integratie van het gehele productie proces kunnen wij u exclusieve producten van hoogwaardige kwaliteit leveren. Onderscheidend, compleet en helemaal van nu.

Alle productie facetten en kennis in eigen huis

Alles uit voorraad leverbaar, snel uw producten in huis en altijd scherpe prijzen! De mogelijkheid om direct in te haken op de nieuwste ontwikkelingen en trends.

Duurzaamheid

Uiteraard willen we de impact van HAMAT op het milieu zoveel mogelijk beperken. Daarom wordt er veel tijd en geld geïnvesteerd in de ontwikkeling van duurzame producten, productiemethodes en procedures om afval te beperken en het energieverbruik te verminderen. Zo hebben wij onlangs onze 100 % natuurlijke kokosmat ontwikkeld.

Innovatie

Ons volledig geautomatiseerde magazijn biedt plaats aan 16.700 pallets. Hierdoor kunnen we zo efficiënt mogelijk werken en staat de voorraad op ieder gewenst moment voor u klaar.

Thanks to our wide range of machinery, we have a tufting capacity of 4 and 5 meters wide. We also have an extensive overlocking department and, together with AVIMAT Coating, we produce entrance mats with a PVC backing.

Our products are packaged entirely as you wish... the sky's the limit! We distribute to factories, wholesalers or even to 300 stores at the same time – anything is possible.

NL

Met een omvangrijk machinepark kan er 4 én 5 meter breed getuft worden. Ook zijn we in het bezit van een zeer uitgebreide festoneerafdeling en kunnen in samenwerking met AVIMAT schoonloopmatten worden voorzien van een PVC rug.

De verpakking van de producten richt zich volledig op de wensen van u als klant... the sky is the limit! Distributie is mogelijk aan fabrieken, groothandel of zelfs naar 300 filialen tegelijk, alles is mogelijk.

Door innovatieve ideeën wordt de variatie in producten steeds groter en nemen de werkzaamheden jaarlijks aanzienlijk toe.

To ensure the best response to your demands and wishes as client, Avimat Coating B.V. has been producing dustcontrolmats, absorbent mats and entrance zones since 1997, with HAMAT taking care of sales.

Production capacity

Over the last 15 years, we have been investing innovatively, resulting in a doubling of our production capacity. What's more, thanks to the skill of our employees and the use of our ultramodern machinery, we offer the latest technical applications and solutions for top-quality cutting, backing and packaging.

Laboratory

We've acquired a great deal of knowledge and experience over the decades. Our products and their specific properties are subject to continual improvement thanks to the testing facilities in our own laboratory.

NL

Om optimaal te kunnen inspelen op de vraag en behoefte van u als klant produceert Avimat Coating B.V. sinds 1997 de schoonloop, droogloopmatten en entreezones waarvan HAMAT de verkoop verzorgt.

Productiecapaciteit

De laatste 15 jaar is er innovatief geïnvesteerd waardoor de productiecapaciteit is verdubbeld en door deskundige medewerkers en het gebruik van een ultramodern machinepark, kan er door de nieuwste technische toepassingen en oplossingen een hoge kwaliteit snijden, backen en verpakken geboden worden.

Laboratorium

De afgelopen decennia hebben we veel kennis en ervaring opgedaan. We verbeteren de producten en de specifieke eigenschappen hiervan continu dankzij testen in ons eigen laboratorium.

HAMAT GROUP has had an international focus for many years. We've had our own production lines for coir roles, coir mats and rubber in India for several years now. Coco Fibre Industries is ISO 9001: 2015, SMETA en C-TPAT certified, so we are able to ensure the continuity of the required quality.

And that means we offer a wide range of products and solutions worldwide. Our production line in India meets all European requirements and certificates, enabling us to better respond to demand and guarantee delivery times.

NL

Als HAMAT GROEP zijn we al jaren Internationaal georiënteerd. Sinds enkele jaren beschikken we over een eigen productie voor kokosrollen, kokosmatten en rubbermatten in India. Coco Fibre Industries Ltd. is ISO 9001: 2015, SMETA en C-TPAT gecertificeerd waardoor we kunnen zorgen dat continuïteit op de juiste kwaliteit wordt gewaarborgd.

Zo bieden wij een breed scala aan producten en oplossingen wereldwijd. Onze productielijn in India voldoet aan alle Europese eisen en certificaten waardoor we in staat zijn optimaal te anticiperen op de vraag en zijn onze levertijden gegarandeerd.

MEMBERS OF THE HAMAT GROUP

GrassPartners specialises in developing and producing artificial grass. GrassPartners, located in Genemuiden in the Netherlands, supplies an extensive range of artificial grass. GrassPartners is an independent new player in the sector, and has a great deal of experience. Based on its philosophy of having a 'Passion for artificial grass', the company carries an extensive and varied collection of premium products for landscaping, leisure, sport and multisport. The products are developed in-house with a distinct Dutch character. When you choose GrassPartners, you opt for a partnership with an organisation that supports its clients throughout the entire process. Not just with products from GrassPartners, but also when it comes to developing qualities under your own private label, that are then produced exactly in line with your specifications.

NL

GrassPartners is gespecialiseerd in het ontwikkelen en produceren van kunstgras. GrassPartners, gevestigd in Genemuiden, biedt een breed assortiment aan kunstgras. GrassPartners is een onafhankelijke nieuwe speler in de branche met veel ervaring. Vanuit de filosofie 'Passie voor kunstgras' voert het bedrijf een uitgebreide en gevarieerde collectie kwaliteitsproducten voor landscaping, leisure, sport en multisport. De producten zijn ontwikkeld in eigen huis met een duidelijke Nederlandse signatuur. Kiezen voor GrassPartners betekent samenwerken met een organisatie die de klant tijdens het hele proces ondersteunt. Niet alleen bij producten van GrassPartners, maar ook bij het ontwikkelen van eigen kwaliteiten onder private label, die exact volgens de specificaties van de klant worden geproduceerd.

Beens Grass Yarns specialises in producing artificial grass yarns. After developing the artificial grass granules, green PE or PP yarns are produced by extrusion. Once the yarns are ready, they are transported to BVBVD on spools where they are tufted into 4m-wide grass mats.

NL

Beens Grass Yarns is gespecialiseerd in het produceren van kunstgras garens. Na het ontwikkelen van de kunstgraskorrels wordt er door middel van extrusie PE of PP garens geproduceerd welke voorzien worden van een groene kleur. Wanneer de garens klaar zijn worden deze per bobijn op transport naar BVBVD gezet om hier op 4m breed getuft te worden tot grasmat.

586 TRAFFIC

Traffic is a contemporary velour entrance mat, available in 6 fashionable, mostly-natural colours. The grey background tone, in combination with the colour accents, ensures that it always complements the surrounding floor, and also hides the greyish tone which entrance mats can acquire over time.

The mat is rated fire class Bfl-s1, which means it complies with the highest fire safety requirements for escape routes. Thanks to its Use Classification 33 (EN 1307), it provides excellent wear resistance and is extremely suitable for heavy duty commercial applications. With Traffic we have created a particularly effective and stylish entrance mat. An attractive looking mat that is perfectly at home in high-traffic environments such as commercial premises, public buildings, hospitals and schools

IT'S THE COCONUT THAT MAKES THE MAT

No nuts no mats

The entire coconut can be used

The coconut is used for different purposes: the white from the inside of the coconut can be eaten or mixed with water to coconut milk, which is widely used in the oriental kitchen.

Many skin care products are also made from this white milk. The rough exterior of the nut is laid in brackish water for half a year so the wires go off which will be spun into yarn and this is what coconut mats are made of.

341 MUDBUSTER

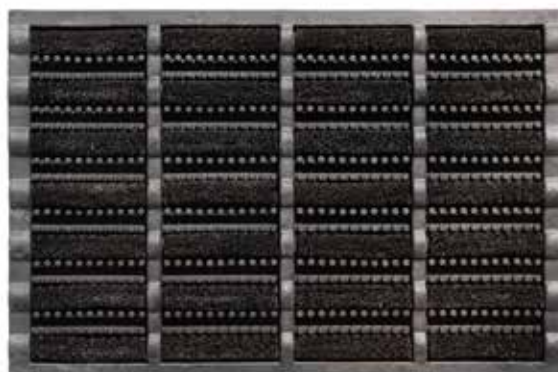

Brush mats are the solution for removing dirt in a living or working environment. The mudbuster is equipped with hard brushes. These remove stubborn dirt from shoes. The mudbuster is often placed outside and therefore very resistant to weather and wind. The natural entrance for inside and outside.

pile material: 60% Rubber / 40% Coir
 thick (mm): 25
 mats (cm): 40x60 / 45x75

A PROFESSIONAL ENTRANCE

SUSTAINABLE & SOPHISTICATED

Our contract mats are made from renewable materials and made for a sophisticated construction. This means these mats are suitable for heavy and intensive use in the most extreme conditions.

Resolutely show dirt ingress the door with our brush mats. This mat removes dirt, sand and other matters from the sole of your shoes. As you walk over the mat, the brushes adapt to the profile of your sole to ensure that street dirt is removed without having to wipe your feet.

The brush mat is most effective when used outdoors, but may of course also be used indoors if required. These mats are available in many different colours.

ENDLESS POSSIBILITIES

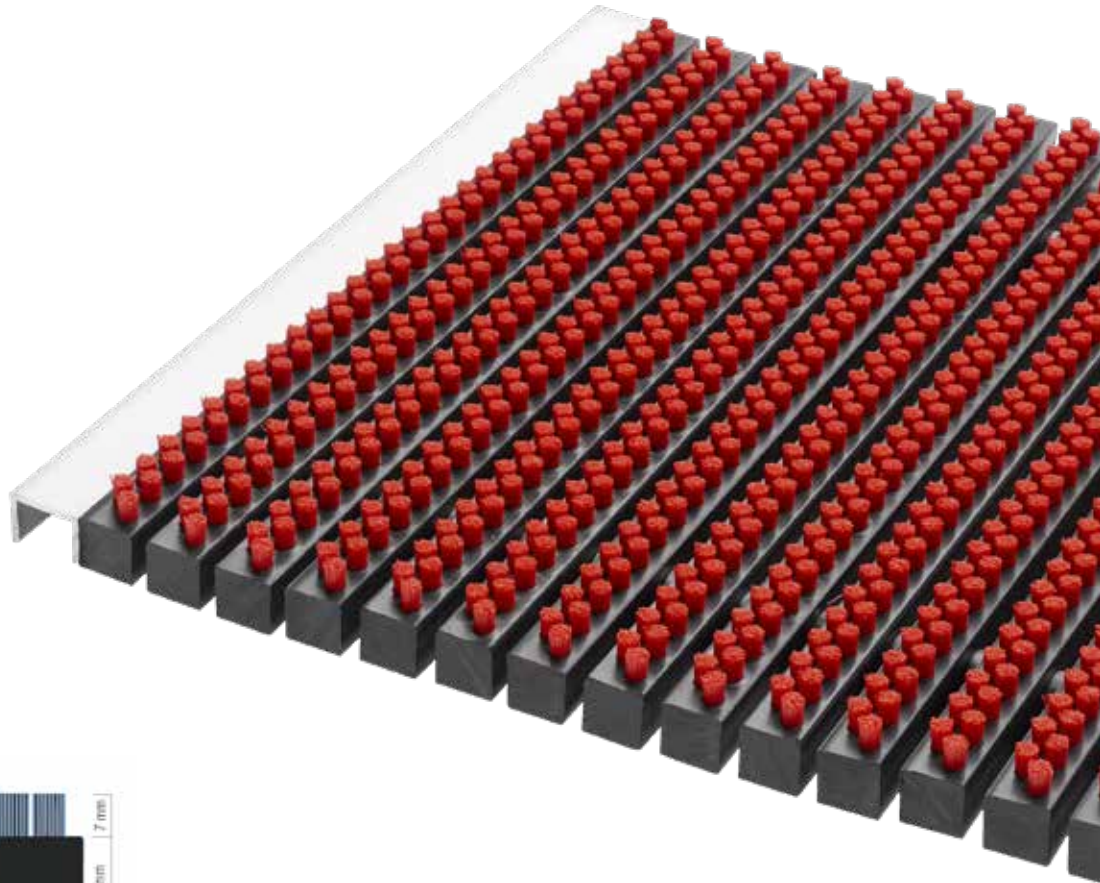

Our brush mats are compiled from stringently selected semi-manufactures. Hard-wearing nylon yarns are cut and bundled into brushes. The hard and impact-resistant plastic profiles are cut to size, after which the holes are drilled. The nylon brushes are then stamped into the profiles. The PVC profiles are threaded together using flexible stainless steel wires, which also function as tensioning cables.

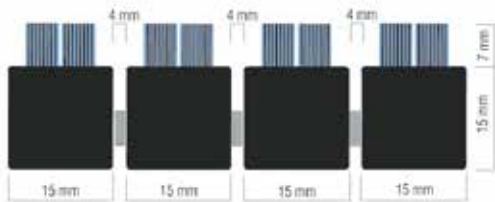

330 PROFI BRUSH

profile material: Hard plastic
 inlay: Nylon 6.6
 profile space: (mm): 4

Always green

INSTALLATION

PREPARATION: Work the substrate into an even working area. Add a minimal amount of filler sand to ensure an even base. Compact with a light vibratory plate compactor. Ensure that the dark earth bordering the artificial grass can't wash over lawn and that the compacted sand layer is 1,5 cm lower than street level. Even out using a smoothing tool. Apply landscaping cloth (optional). Lay out the artificial grass, pull smooth, align any seams (the artificial grass can be trimmed from the underside). Seams between various strips may not be wider than 3 mm. Trim the grass and the landscaping cloth.

Please note: To prevent colour discrepancies, only order 2 or 4-meter rolls. Never combine roll widths.

VOORBEREIDING: Steek het bestaande gazon zo vlak mogelijk af. Opvullen met minimaal ophoogzand; om eventuele oneffenheden weg te nemen. Aantrillen met lichte trilplaat. Zorg dat aan de borderkant de zwarte grond niet over het kunstgras en eventuele kantopsluiting kan spoelen en dat de nagetilde zandlaag 1,5 cm lager ligt dan de stoepzijde. Egaliseren met lat. Eventueel worteldoek aanbrengen. Kunstgras erop leggen, vlak trekken, eventuele naden tegen elkaar leggen (u kunt het kunstgras vanaf de onderkant insnijden). De naden tussen de verschillende banen mogen niet breder zijn dan 3 mm. Het gras en worteldoek bijsnijden.

Let op: Om kleur verschil te voorkomen alleen rollen van 2 of 4 meter breed bestellen, de rolbreedtes nooit combineren.

1

EN Always lay the strips in the same pile direction to prevent colour variations.

NL Leg altijd de banen die gelast moeten worden in dezelfde poolrichting om kleurverschil te vermijden.

2

EN Fold open any seams, apply tape evenly between the turf.

NL Klap de eventuele naden open, leg tape zodanig dat hij aan weerszijden even breed onder de grasmatten komt te liggen.

3

EN Remove the protective film.

NL Verwijder de beschermfolie.

4

EN Fold the tuft back over the tape and apply pressure. Ensure that no fibres are folded under the turf (over hanging).

NL Klap de matten terug over de tape.

5

EN Distribute the filler sand evenly over the artificial grass.

NL Druk deze aan en zorg hierbij dat er geen vezels onder de mat komen.

6

EN Brush the grass for an even distribution of the sand (approx 5/10 kg per sqm, with the direction of the pile!).

NL Verdeel het kwartzand (ca. 5/10 kg per m²) gelijkmatig over het kunstgras.

7

EN Brush the fibres against the grain using a hard brush (preferably synthetic) so that the blades are pulled upwards.

NL Veeg hier overheen voor een goede verdeling van het zand (met de poolrichting mee!). Veeg met een harde bezem (liefst kunststof) de vezel tegen de richting in zodat deze rechtop komt te staan.

FR Le sol qui fait votre maison

IDENTITY THE FLOOR THAT MAKES YOUR HOME

What is a pvc floor?

PVC flooring consists of strips or tiles made of synthetic material composed of several layers to create a super strong and wear-resistant floor. The PVC Identity floors come in a range of designs, colours and sizes. We also differentiate between the various wear classes such as domestic and contract use.

Natural look and feel

Looking for new flooring? The Identity collection includes a perfect fit for your particular space. In addition to flooring with a concrete appearance, all floors have a natural look and feel and can hardly be distinguished from an actual wood floor. All PVC floors in the Identity collection are: wear resistant, maintenance friendly, durable,

realistic, suitable for underfloor heating and have a Blf-S1 fire classification. All our PVC options are Dry-back and have to be fully glued down.

Strips and tiles

PVC flooring is available in both strips and tiles. Because it allows for a variety of colours and patterns, floors can be installed in the design of your choice. It is for good reason that PVC floors are so very popular nowadays.

100% RECYCABLE

The PVC floors in the Identity collection are durable in a variety of ways:

High quality

Reduces noise

Suitable for underfloor heating

Environmentally friendly

UV and water resistant

Easy to maintain

Fire retardant

Non-slip

Stripe and stain resistant

Durable and wear resistant

Embossed In Register

EIR is a manufacturing method that perfectly aligns the top coat embossing on the plank with the printed design to create a true-to-nature and lively look and feel for every Identity PVC floor. Like wood flooring, they also include tactile decorative effects such as planks and knots to create the most realistic appearance possible, which makes Identity PVC flooring feel like a natural wood floor.

901 REALISTIC

quality: Realistic
 embossing: Overall
 dimensions (cm): 22,86 x 121,92
